

## Jean Dodd D.V.M Vaccination Protocols

\*NOTE\* While in the discussion on Dr Dodd's webpage it states Adenovirus is considered a "Core" or recommended vaccination, she does NOT list it in the chart as to WHEN it is to be given.

<b>Vaccination</b>	<b>Age</b>
Distemper and Parvo (MLV)	9-10 weeks, again at 14 weeks and (optional) at 16 weeks
Rabies	20 weeks or older if allowable by law
Distemper and Parvo (MLV), Rabies (killed, 3 yr product). Give Rabies 3-4 weeks apart from distemper and parvo booster)	1 yr
